Construction Subcommittee Meeting 1

Friday, October 25

10 a.m. to 11:30 a.m.

Senate Hearing Room, Legislative Hall

Task Force Charge

Make findings and recommendations on how the State and local governments can promote the production of rental units and homes that are affordable at various income levels throughout Delaware.

- Consider and review best practices related to land use, affordable housing production, and affordable housing financing adopted in other states;
- Review zoning and permitting laws and regulations that govern residential land use and evaluate how well they enable or inhibit the production of affordable housing; and
- Study and review land use development and residential housing construction industry practices to determine what factors, in Delaware, are limiting the production of affordable housing opportunities for households below 120% AMI.

Approach to Task Force Charge

- Identify challenges and barriers to increasing supply to match demand
- Identify potential solutions
- Prioritize actionable recommendations and strategies
- For each recommendation, indicate:
 - Who should implement (State/Local Gov't/Private Sector);
 - Whether implementation will require legislation, regulatory changes, and/or funding subsidies

Construction Subcommittee

Stakeholders Required to be Represented:

- Delaware Workforce Development Board
- Architectural Firms
- Civil Engineering Firms
- General Contractors

Required Topics to Review:

- Workforce Development
- Innovative home construction methods

Parking Lot

- To be used to document ideas that are unrelated to production and our required focus areas, but still housing-related
- These items can be referred to other subcommittees (as appropriate) or acknowledged in the final report as something needing further study

Projected Housing Needs

- DSHA's 2023 Statewide Housing Needs Assessment projects how many housing units are needed by 2030 to keep up with growth
- The projections are broken down by county, tenure (i.e., owner-versus renter-occupied units), and affordability as measured by a percentage of Area Median Income
- The projections assume that the state's current homeownership rate (71%) remains steady
- *The projections are in addition to the existing shortage of **19,400** rental units that are affordable to households making 0-50% AMI*
